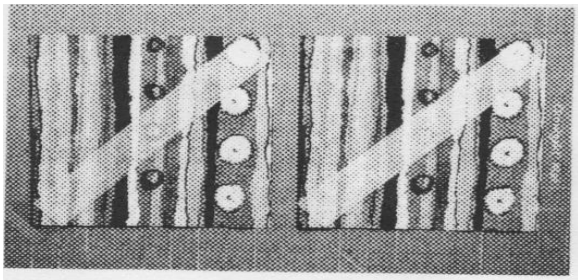
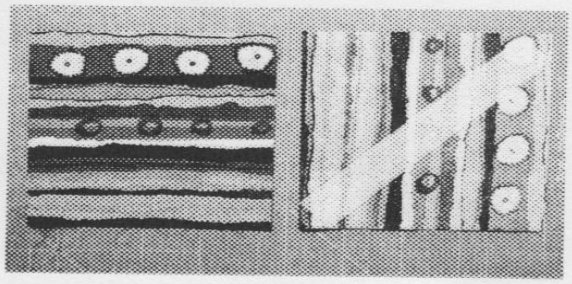
December 2012 Lotto Block

Anita's Unbiased Block, from Make it Simpler.

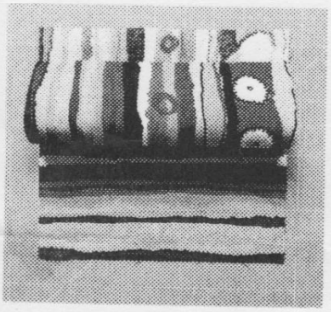
You may use the fusible interfacing strips or cut your own. Using Christmas stripe please follow the directions below. Step #6 was omitted, as it was unnecessary for the block.



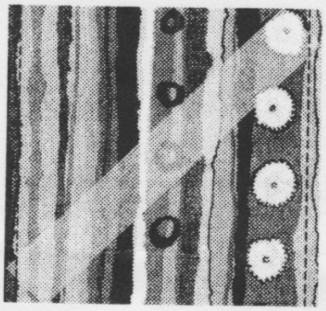
1 Cut two identical 8 1/2" squares from stripe fabric. Position them wrong side up, same stripes running vertically. Fuse 10 1/2" strips of *Make It Simpler® Fusible Interfacing*, diagonally from lower left to upper right. *Note wide green stripes positioned vertically at the left edges.*



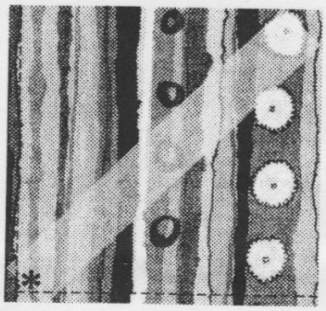
2 Turn the LEFT square right side up. Rotate it to position the green stripe horizontal at bottom.



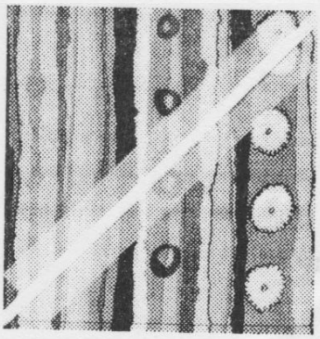
3 Slide RIGHT square on top of left square. The squares will be right sides perpendicular to each other. Both green stripes must overlay at the lower left.



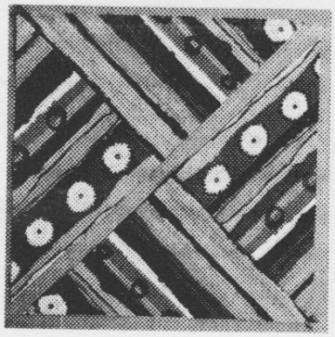
4 Sew the pair together on two sides with a 1/4" seam allowance and back-stitching. Sew any two opposite sides together or sew any two adjacent sides together.



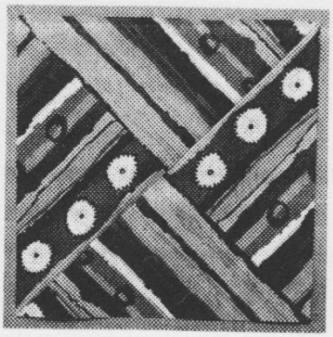
5 *Adjacent seam lines MUST 'corner' through the interfacing.



7 Cut the pair through the Interfacing.



8 Open the units, press the seams and sew together with a 1/4" seam allowance.



9 True up the block to 10 1/2" square.
